

SANGAMANATH KAMBAR

Full Stack Java Developer | Java Developer | Software Engineer
Bengaluru, KA | +91-9008571351 | sangukambar0@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Fresher Full Stack Java Developer with a solid foundation in Core Java, OOP Concepts, JDBC, JSP, and Servlets, and hands-on experience building database-driven web applications with Oracle Database, MySQL, and RESTful APIs. Completed a Software Development internship at KodNest Technologies, delivering Java modules and API integrations in an Agile environment. Built multiple full-stack projects using MVC architecture, most notably a Question Paper Generator with automated PDF generation, along with a Hotel Management System and a Train Ticket Reservation System. Seeking a full-time Java Developer role while advancing skills in Spring Boot, Spring MVC, and Hibernate.

TECHNICAL SKILLS

Programming Languages: Java, SQL

Web Technologies: HTML, CSS, JavaScript, JSP, Servlets

Backend: JDBC, REST APIs

Database: Oracle Database, MySQL

Tools: Eclipse IDE, Apache Tomcat, Git, GitHub, Postman

Concepts: OOP, MVC Architecture, Data Structures & Algorithms, Exception Handling, Collections Framework

Currently Learning: Spring Boot, Spring MVC, Hibernate

PROFESSIONAL EXPERIENCE

Software Development Intern — KodNest Technologies, Bengaluru

Jan 2025 – Mar 2025

- Developed web application modules using Core Java, HTML5, CSS3, and JavaScript as part of Java full-stack training projects.
- Designed MySQL database tables and wrote SQL queries for CRUD operations using JDBC to support application data handling.
- Integrated RESTful API endpoints with the frontend using JavaScript Fetch API; performed manual testing to identify and resolve bugs during Agile sprint cycles.
- Collaborated with developers and QA engineers in daily standups and code reviews; managed version control with Git/GitHub using branching and pull requests.

PROJECTS

Question Paper Generator (QPG)

Tech Stack: Java, JSP, Servlets, JDBC, Oracle Database, HTML, CSS, JavaScript, Apache Tomcat, iText PDF Library

- Developed a full-stack web-based Question Paper Generator to automate examination paper creation and management, with an admin module for subject management, question management, paper generation, and generated-paper tracking.
- Built database-driven functionality using JDBC to manage subjects, questions, generated papers, and paper-question relationships, applying CRUD operations and MVC architecture with Java Servlets.
- Integrated the iText PDF library to generate professionally formatted question papers with headers, footers, borders, and structured layouts.
- Designed JSP-based user interfaces with HTML and CSS for smooth, intuitive user interaction.

GitHub Repository: [View Repository](#)

Hotel Management System

Tech Stack: Java, JSP, Servlets, JDBC, Oracle Database, HTML, CSS, Apache Tomcat

- Built a full-stack web application to automate hotel operations, including room management, customer bookings, and payment processing.
- Implemented Admin and Customer modules with secure login, and Add/View/Update/Delete room operations using Servlets and JDBC.
- Integrated Oracle Database via JDBC to manage users, rooms, bookings, and payment records; designed responsive UI using JSP, HTML, and CSS.

GitHub Repository: [View Repository](#)

Train Ticket Reservation System

Tech Stack: Java, JSP, Servlets, JDBC, Oracle Database, Apache Tomcat, HTML, CSS, JavaScript, Git

- Developed a web-based reservation system supporting user registration, login, train search, seat availability, fare enquiry, and ticket booking.
- Built admin features to manage train details using MVC architecture and session management for secure authentication.

GitHub Repository: [View Repository](#)

Weather App

Tech Stack: HTML5, CSS3, JavaScript, Weather API, JSON, Responsive Design

- Built a responsive weather application integrating a third-party Weather API for real-time temperature, humidity, wind speed, and condition data.
- Implemented geolocation-based auto-detection, Dark/Light Mode toggle, and Recent Search History with error handling for invalid inputs.

EDUCATION

B.E. in Computer Science — Poojya Doddappa Appa Engineering College, Kalaburagi

CGPA: 6.46 | 2026

CERTIFICATIONS

- Generative AI & Deep Learning: Roadmap to a Successful Career — HCL Technologies (Apr 2026)
- Investment Banking Job Simulation — J.P. Morgan, Forage Virtual Experience (May 2026)

ACHIEVEMENTS

- Practiced Java and Data Structures & Algorithms problems to strengthen problem-solving skills and programming fundamentals; built multiple full-stack applications using Java, JSP, Servlets, JDBC, Oracle Database, MySQL, and JavaScript.
- Maintained active, consistent GitHub contributions across multiple personal and academic projects.
