

SANGAMANATH KAMBAR

Full Stack Java Developer | Java Developer | Software Engineer Trainee

Bengaluru, Karnataka, India | [+91-9008571351](tel:+91-9008571351) | sangukambar0@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Aspiring Full Stack Java Developer (B.E. Computer Science, 2026) with hands-on experience in Core Java, OOP, JDBC, JSP, Servlets, and RESTful API development. Built and deployed database-driven web applications using MVC architecture, Oracle Database, and MySQL, including a Question Paper Generator with automated PDF generation. Completed a Software Development internship at KodNest Technologies, contributing to Java modules and API integrations within Agile sprints. Proficient in Git/GitHub version control, with active upskilling in Spring Boot, Spring MVC, and Hibernate. Seeking a full-time Java Developer / Software Engineer role to build scalable, high-quality software solutions.

TECHNICAL SKILLS

- **Languages:** Java, SQL
- **Web Technologies:** HTML5, CSS3, JavaScript, JSP, Servlets
- **Backend & APIs:** JDBC, RESTful APIs, MVC Architecture
- **Databases:** Oracle Database, MySQL
- **Tools & Platforms:** Eclipse IDE, Apache Tomcat, Git, GitHub, Postman
- **Core CS Concepts:** OOP, Data Structures & Algorithms, Exception Handling, Collections Framework
- **Currently Learning:** Spring Boot, Spring MVC, Hibernate

PROFESSIONAL EXPERIENCE

Software Development Intern — KodNest Technologies, Bengaluru

Jan 2025 – Mar 2025

- Engineered web application modules using Core Java, HTML5, CSS3, and JavaScript as part of full-stack training initiatives, strengthening object-oriented design and front-end integration skills.
- Designed MySQL database tables and authored SQL queries; implemented CRUD operations via JDBC to support reliable application data handling.
- Integrated RESTful API endpoints with front-end components using the JavaScript Fetch API; performed manual testing to identify and resolve functional bugs across Agile sprint cycles.
- Collaborated with developers and QA engineers in daily standups and code reviews; managed version control using Git/GitHub with feature branching and pull requests.

PROJECTS

Question Paper Generator (QPG)

Tech Stack: Java, JSP, Servlets, JDBC, Oracle Database, HTML, CSS, JavaScript, Apache Tomcat, iText PDF Library

- Engineered a full-stack Question Paper Generator to automate examination paper creation, with dedicated modules for subject management, question management, paper generation, and generated-paper tracking.
- Implemented database-driven CRUD functionality using JDBC across subjects, questions, generated papers, and paper-question relationships, applying MVC architecture with Java Servlets.
- Integrated the iText PDF library to auto-generate professionally formatted question papers with structured headers, footers, and borders, removing the need for manual formatting.
- Designed JSP-based UI with HTML and CSS for smooth, intuitive admin interaction.

GitHub Repository: [View Repository](#)

Hotel Management System

Tech Stack: Java, JSP, Servlets, JDBC, Oracle Database, HTML, CSS, Apache Tomcat

- Developed a full-stack web application automating hotel operations, including room management, customer bookings, and payment processing.
- Implemented secure Admin and Customer login modules with complete Add/View/Update/Delete room functionality using Servlets and JDBC.
- Integrated Oracle Database via JDBC to manage users, rooms, bookings, and payment records; designed a responsive UI using JSP, HTML, and CSS.

GitHub Repository: [View Repository](#)

Train Ticket Reservation System

Tech Stack: Java, JSP, Servlets, JDBC, Oracle Database, Apache Tomcat, HTML, CSS, JavaScript, Git

- Built a web-based reservation system supporting user registration, login, train search, seat availability, fare enquiry, and ticket booking.
- Developed admin features to manage train details using MVC architecture, with session-based authentication ensuring secure access control.

GitHub Repository: [View Repository](#)

Weather App

Tech Stack: HTML5, CSS3, JavaScript, Weather API, JSON, Responsive Design

- Built a responsive weather application integrating a third-party Weather API for real-time temperature, humidity, wind speed, and condition data.
- Implemented geolocation-based auto-detection, Dark/Light Mode toggle, and Recent Search History, with robust error handling for invalid inputs.

EDUCATION

B.E. in Computer Science — Poojya Doddappa Appa Engineering College, Kalaburagi | CGPA: 6.46 | 2026

CERTIFICATIONS

- Generative AI & Deep Learning: Roadmap to a Successful Career — HCL Technologies (Apr 2026)
- Investment Banking Job Simulation — J.P. Morgan, Forage Virtual Experience (May 2026)

ACHIEVEMENTS

- Practiced Java and Data Structures & Algorithms problems consistently to strengthen problem-solving skills and programming fundamentals, applied across multiple full-stack applications built with Java, JSP, Servlets, JDBC, Oracle Database, MySQL, and JavaScript.
- Maintained active, consistent GitHub contributions across multiple personal and academic projects.
